

Comments to the Application from Khorrambid

We have read your application with great interest and we have the following comments:

Your Application is very well written and apparently a lot of work has been done with the Injury prevention in Khorrambid.

We are impressed by the work going on in your district and the planning for the future. It is easy to read and you get a very good understanding of the activities.

Overall seems that the community qualifies to be certified as a safe community. However to be certified the application must describe:

1. How are the different task groups working and how is the work organised and governed in the community.
2. We want to know more about how you work with violence, ex domestic Violence, street violence and suicide
3. A special paragraph should describe falls prevention and suicide prevention
4. In Indicator 3 you should describe activities for vulnerable groups like drug abuser etc. handicapped, street children, unemployed etc
5. After revising your report you should fill out our questionnaire (attached in the mail)

We are looking forward receiving you revised report and are planning for your designation, hopefully in October.

With Kind regards
