Surveillance of injuries:

Information about injuries in Napier has been obtained from:

- ACC Injury Statistics Report (2008)
 - Hawke’s Bay District Health Board
 - Hawke’s Bay District Road Safety Report (2003-2007)
 - Injury Prevention Research Unit (2001-2005)
 - Napier Police
 - NZ Fire Service
 - NZ Recorded Crime Tables, Statistics NZ (2003-2008)
 - NZ Transport Agency (2008)
- Falls and adverse effects are the two leading causes of injury followed by motor vehicle traffic, poisoning and struck by or against an object.
 - Home is the highest common scene of injury followed by school, other institution and public administrative area then street and highway.
 - Fatalities due to injury are suffocation, fall, motor vehicle traffic and poisoning.
 - The most vulnerable age groups for injury are 60+ years, 25-59 years and 0-4 year olds. Falls are the leading cause of injury for over 65 year olds. Suicide for people aged 20-74 years and motor vehicle crashes for 20-84 year olds are the two leading cause of injury resulting in death.

Numbers per year:

- During 2007, 785 people from Napier were hospitalised overnight for treatment of an injury. The average for 2003 - 2007 was 725.
- Injury by fall was highest cause with 279 in 2007 compared to 116 for adverse effects and motor vehicle traffic at 73. For 20-84 year olds motor vehicle crashes is the second major cause of injuries resulting in death.
- ACC claims for Napier increased by 33% from 2004 to 2009. Across the age groups the claiming rate for 20-25 year olds age group is increasing.

Population base: Napier City 57,200 (Projected for 2008)

External Cause of non-fatal injury (all intents) by year of discharge, Napier TLA. Primary Diagnosis of injury, first admissions only, hospital stay > 24 hours
