Surveillance of injuries:

Every year around in Nelson Tasman there are around 10,000 visits to Nelson Emergency Department because of an injury. According to the National Injury Query System - Otago University, each year from 1988 to 2007 the rates of fatal injuries in the Nelson Marlborough District Health Board have ranged from the lowest of around 39/100 000 persons to the highest of 51/100 000. In the same time period hospital discharges ranged from 935/100 000 to around 1309/100 000 people.

In the Nelson Tasman community the injury information for local action programme uses a wide range of sources to inform local planning and monitoring. These include:

- Emergency department data to inform identification of locations or population groups.
- ACC regional injury statistics
- 1996 - 2006 New Zealand Census data from Statistics NZ
- NZ Police data for crimes and road offences and crashes
- New Zealand Transport Authority (NZTA) road injury publications for Nelson and Tasman territorial local authorities
- Deaths and hospital discharges (1988 – 2007) found at National Injury Query system, Injury Prevention Unit –Otago University

- Other publications such as Safe Communities Foundation Factsheets, Safekids statistics, Child and Youth Epidemiology Department – Otago University, Child Youth Mortality Review Committee reports

Produced information material, pamphlets:

- Many road safety information resources including safety at intersections
- A range of information resources for all ages to support the KidPower/Teenpower/ Fullpower initiatives.
- Family violence resources including banners/ leaflets/posters promoting messages to reduce levels of family violence.
- Safe Use of Medicines rack card
- Translation Kit and Chin Community Access to Pharmacy guide
- Safe Use of Medicines booklet and minor ailments leaflets
- Prescription Subsidy Card Poster
- Services that a Pharmacy Provides poster
- Youth Services Directory Nelson/Tasman
- Health Service directory
- Be Well Website
- Well child pamphlet
