The programme covers the following safety promotion activities:

For the age group

Children 0-14 years:

1. Campus Environmental Improvement

Before the beginning of each semester and each day, the safety investigation and remediation for the school and kindergarten facilities and a large toy is conducted.

2. Multiple themes safety education safety program

Through the creation of school safety classes, open mobile security and cultural corridor, safety education compose songs, performing security scenario, regional games, singing contest themed events, stories on safety, improving child safety awareness. Organization "safe and civilized action" speech contest, Hand-copied newspaper tournament, held wild evacuation drills, watching films such warning, which allows students to be educated in the activity.

3. Emergency drill plans

Convene an emergency plan quarterly exchange, carding, exchange contingency plans. According to the actual situation, take regular and periodic time to carry out evacuation drills to determine the theme of the program. Students and teachers build capacity to respond to emergencies. Meanwhile, the students carry out evacuation drills at home in case of family emergencies.

Youth 15-24 years:

1. Students drowning prevention safety promotion program

Cooperation through the establishment of long-term mechanism for children drowning multisectoral interventions, including the public (students, parents, etc.) of propaganda and mobilization, multi-level education and training and participatory teaching to enhance students' understanding of active participation. Carry out a variety of topics related to drowning intervention activities; strengthen surveillance and

patrols; installation of fences and other environmental improvements.

2. Evidence-based programs: Students drowning prevention safety promotion program adopted the effective measures issued by the Ministry of Health of China."The child drowning intervention techniques Guide" recommended and effective, nearly four years has not occurred case of children, adolescents drowning fatalities.

Adults 25-64 years:

1. The new behavior to improve public safety

For the weak knowledge of public safety issues of the new residents, make full use of community bulletin boards, lectures and other forms to propagate the public safety. 2012 onwards, Renhe Subdistrict Office to create "happy life, five cardiac services" and "Seven Care Package" program to concern about the care of new residents from the full range.

2. Gas Safety Plan

For the lack of safety knowledge of the new residents, carry out safety lectures, organize residents gas leak emergency drill through the citizen schools. Meanwhile, the volunteers of the safe use of gas, home-related functions to detect the investigation in a timely manner to eliminate safety hazards checks

3. Rental housing management plan

A large number of migrant workers need to rent a house, so the community employed full-time rental housing management assistant to account rental housing registration and the registration rate is more than 98%. Meanwhile help migrant workers to solve practical problems such as their children to school and asking for salary after working. Organize skills training and job fairs regularly to solve the employment problem for migrant workers. Through a variety of activities so as to enhance mutual understanding between migrant workers and local residents to enhance their sense of belonging.

4. Legal Advice stations and disputes mediation room

Since there are many rental households in the area, often involving lease disputes less than one thousand RMB between rental households and floating population, In early 2011, we set up specialized legal advice stations and disputes mediation room in eight communities, hiring professional legal adviser dealing with community mediation.

Aged 65 years and older

1. Elderly fall prevention safety plan

For the elderly prone to falls injuries, professionals conduct fall prevention, health education and related safety knowledge, limb balance training of trainers for the elderly and their families relying on hospitals and community health centers,; Improving elderly home environment. Installing bBarrier free facilities in activity sites and roads. The volunteers provide visiting service regularly.

2. Elderly care plan

Renhe Subdistrict start elderly care plan, build elderly health records; Create a rich, happy and safe life for the elderly. Organize volunteers in community to help the illness, severe disability, elderly people living alone. So far they provide help for more than 160 people in need and on a regular basis for each elderly; Free installation pagers for 19 elderly people in need to provide emergency assistance and services. Comprehensively promote home care mode and day care to innovate services for the elderly and improve the satisfaction of the elderly.

Natural Disasters

1. Construction of comprehensive disaster reduction demonstration community

In view of the weak consciousness and self-aid and buddy-aid on disaster prevention and mitigation of the new residents, we have been carry out the construction of disaster reduction demonstration community since 2011. We develop extensive community mobilization of disaster reduction, participation activities and disaster risk assessment. _Make clear the distribution of community elderly, children, pregnant women, the sick, the disabled people and other vulnerable groups. Also set up Renhe comprehensive emergency rescue team and establish emergency disaster prevention and mitigation team in all community.

Suicide Prevention (self-mutilation injury)

The psychological counseling, legal counseling room in the community offers professional services for residents, new citizens to solve problems and mediate

conflicts and disputes; Community volunteers offer visiting service monthly for the empty nest, lonely old and the disabled to check on their health, chat with them and do housework. Professional legal advisers are also hired to offer free legal advisory assistance and other services for the temporary residents and safeguard their legitimate rights and interests.

Each school has offered courses in psychology and constructed psychological consultation platform in the school. Municipal and district-level education departments are responsible for supervision. Psychological service is offered for the left-behind children and children of migrant workers.

Prevention programs for high-risk population

1.The disabled security plan

Transformation accessibility for the 61 poor disabled families and free distribution of wheelchairs, crutches, walkers, canes and other teaching aids; Establish a "home care support mode" for severe disabilities ;Set "disability rehabilitation rooms" in four communities to provide free services. Meanwhile, establish "one to one" assistance measures conducted by volunteers, visiting to their home quarterly for routine psychological counseling and the daily work of rehabilitation.

2.Safety and care of the disabled of "Great Printing" company

The company design reasonable jobs for the disabled because of the large number of the employees with disabilities. Installed lights flashing prompted alarms, smoke alarms, audible alarm for escape and rescue and conduct emergency evacuation drills every quarter; Also determine the rescue aid. Set up a charity fund. Provide skills training for people with disabilities. Set the barrier free environment. The past five years, safety awareness of the disabled employees improved resulting in zero of security incidents and injuries occurred.

3.Two wheel motorcycle safety program

There are many two wheel motorcycles in the community, which caused frequent occurrence of traffic accidents. The community established account of the two wheel motorcycles and encouraged motorcycle owners to do brand registration. At the same time, the

community to develop many forms of promotion activities in key sections. Carry out comprehensive law enforcement every quarter to step up efforts to control the road.

Prevention programs for high-risk environments

1.High-risk road safety promotion program

The road from Armed Police Seventh Detachment in Jinkai road to Chongqing Sichuan Opera Theatre is the main road of the area, which is also a section of risk road because of better road conditions, large traffic and pedestrian and the long downhill. Installed speed bump on the downhill road;_set signs of slow down, speed identification and installed automatic speed measuring device; constructed crossover In crossroads to separate the pedestrian and vehicles.

2. High-risk building fire safety promotion program

There are 149 high-rise buildings including hospitals, hotels, residential, etc. in the area. The risk of fire is relatively high. Renhe Subdistrict adopt the formation of the Fire three with high-rise buildings for the division units and conduct the implementation of community-sophisticated management mechanism and also improve fire protection facilities and equipment; Working with Fire Brigade to investigate hidden danger of the high-rise buildings quarterly and organize high-rise building fire fighting exercises. Carry out urban (high-rise buildings) Family Fire "six" activities.
