Favorview Palace Kindergarten’s safety promotion program
a. Creating safety culture and a safe campus.
b. Developing safe scenario games and opening safety education courses.
c. Setting up a safe environment in all floors and classrooms.

7. Program for promoting safety of the disabled

“Evidence-based” Safety Promotion Programs

1. Safe enterprises promotion program: designed on the basis of the Basic Rules for Standardization of Work Safety in Enterprises published by the State Administration of Work Safety in 2010 and implemented by the enterprises in the Community to meet the criteria for standardization.

2. Safe traffic promotion program: designed on the basis of the World Report on Prevention of Injuries in Traffic Accidents, World Health Organization Report: Intervention against Driving after Drinking and Guidelines for Prevention of Road Traffic Incidents (by Wang Qionghua, Hunan Map Publishing House, 2005), and is implemented through the measures of
educating all members on traffic safety, improving traffic environment and strengthening law enforcement.

3. **Safe elderly promotion program:** designed by reference to the measures recommended in the *Technical Guidelines for Intervention against Elderly’s Slips* and is implemented through these measures, such as renovating the accessible facilities and road surfaces to eliminate any potential risks in the environment that may lead to the elderly’s slips, offering balance training to the elderly people (Measures for Hope) and education on how to prevent slips, paying regular visits to those elderly people who live alone and paying special attention those elderly whose children are not with them or those elderly who are very old, and conducting evaluations and interventions on the elderly’s home environment.

**Injuries monitoring**

1. Monitoring system:

   (1) The Community Health Service Center maintains timely monitoring of injury information of those residents who come for treatment and conducts statistical summary and analysis, and provides feedbacks to the Sub-district’s Safe Community Building Office at the beginning of the following year;

   (2) Accidents and injuries monitoring spots are set up in schools, key enterprises and property management companies, so that the statistics from injury records may be reported to the Sub-district’s Safe Community Building Office in a timely manner;

   (3) Functional departments for work safety, traffic, public security, fire prevention, industry and commerce, food and drugs, and urban administration provide the Sub-district’s Safe Community Building Office with the accident and injury data from their monitoring and statistics at the beginning of every year;

   (4) The Sub-district’s Safe Community Building Office prepares a questionnaire for conducting a survey on the residents in the safe community, so as to understand the injury situation of the residents and their satisfaction with building a safe community;

   (5) Different workgroups conduct interviews on those victims in some representative injury
cases, with a view to have a deep understanding of the detailed information of the injuries, keep statistics and summary of the accident and injury monitoring records, and working out preventive and corrective measures.

(6) The Safe Community Building Office collects injury monitoring data from medical departments, professional and functional departments, schools and enterprises on a quarterly basis, and works out an injury monitoring report through summary, classification and analysis of the accidents and injuries data. It submits the injury monitoring report to the Promotion Committee and safety program workgroups for direction on the program planning and evaluation of program results.

2. Number of injuries by year: The total number of injuries is 86 in 2010, 83 in 2011, 87 in 2012 and 189 in 2013.

3. Who are monitored: Residents living and people working in Wushan Sub-district.

4. Monitoring starting from: 2010

5. Data analysis: with spss software
