The following information shall be short, maximum 10 A4 pages including photos (in jpg format)

The programme covers the following safety promotion activities:

For the age group

Children 0-14 years:

School safety: Xiaoguwei community actively raises funds to regularly maintain campus facilities, guaranteeing safety management of primary schools; strictly requires school hire qualified staff, who are both physically and mentally healthy; prohibits using toxic and harmful materials to produce toys and pays attention to the safety of all kinds of environment; strengthens medicine-taking management in school and monitors students to take medicine according to parents' requirements, so pupils can take medicine timely and accurately with no wrong medicine taken or missed; enhances school bus safety management, strictly implements relevant traffic regulations and campus safety codes to ensure the safety of teachers and students. Xiaoguwei community sets up class safety responsibility system to better manage class safety work in daily activities, during meals and in hygiene area.

Pupil's psychological health education: to solve problems occurred in students' study and growth, psychological classes are given regularly. A small but complete consultation room is set up and opens three days a week.

4:30 class and Sunshine Campaign for children of rural migrant workers.

Traffic safety programs for students in primary and middle school: traffic police go into schools to publicize traffic safety knowledge; schools set up student traffic teams, which guide students to cross streets during peak period.

Youth service programs in Xiaoguwei Integrated Family Services Centre: case consultations, tutoring, board role-playing games, interest groups, resilience training, etc.

Evidence-based strategies: 4:30 class and traffic safety programs for students in primary and middle school.

Youth 15-24 years:

Food safety programs: Xiaoguwei community strengthens training and requires university canteen managers to enhance daily self-check and self-modification; cooperates with relevant functional departments to intensify routine inspections of all collective canteens; urges canteens to be equipped with health facilities according to their own situation and relevant provisions; establishes a complaint system, releases food safety complaints telephone number and accepts students' complaints on food safety in canteens.

Traffic: Xiaoguwei community cooperates with traffic police to remind students, through lectures, publicity and other ways, of riding bike safely, wearing helmet, and obeying traffic rules on campus; sets up speed humps at campus crossings to reduce car speed; establishes school vehicle registration system to strengthen management; arranges university security guards and traffic volunteers to direct traffic order during peak period.

Psychological health promotion programs: with the help of Psychology Consultation Center of South China Normal University, Xiaoguwei community sets up an advanced psychological health record system for undergraduates and postgraduates; sets up a four-level psychological health protection net consisted of university, faculty, grade and dormitory; makes full use of website and university publicity board to publicize psychological health knowledge; establishes counselors reporting students' psychological crisis system.

Sports safety promotion programs: Xiaoguwei community strengthens monitoring of sports equipment and scientifically plans, manages and uses stadiums and equipment; regularly trains facility management staff; enhances publicity of sports injury prevention; establishes PE class safety system.

Safety promotion programs for university automatic fire control facilities: Xiaoguwei community increases communication with different departments, regularly convenes meetings, clarifies responsibilities, improves university firefighting management, sets up regular maintenance system of automatic fire control facilities and timely repairs malfunctioned equipment.

University police room programs: a police room is set up in every university with police stationed; contacts and other information of the police are released, so students and teachers can turn for help; the police keep in close contact with university security divisions to timely know university security conditions and carry out publicity of anti-fraud and anti-pyramid selling.

Student dormitory safety promotion programs: Xiaogwei community strengthens electricity and fire safety education for students; improves dormitory safety management system and assigns exact person to be responsible for dormitory management; gives full play to Students' Union and university security divisions to irregularly check dormitory safety; if any dangerous electric products are discovered, university security divisions will take them away.

Evidence-based strategies: psychological health promotion programs and sports safety promotion programs.

Adults 25-64 years:

Skill training and psychological counseling programs for the disabled: Xiaogwei community increases publicity and supervision to make the public correctly understand and treat the disabled who can in turn make a contribution to the society; invites experts from Labor Bureau to carry out occupational training and guidance for the disabled; provides psychological counseling for the disabled through occupation therapy station; organizes disabled to take part in sports activities; organizes the disabled to get occupational and productive skill training and participate in production.

Firefighting safety programs: Xiaoguwei community inspects and registers all public fire hydrants and encourages public to report destruction behavior of public firefighting facilities; carries out several fire fighting lectures and drills every year; strengthens fire fighting safety inspections of rental houses and “three small venues”; conducts firefighting safety promotion programs in public places full of crowds, and high-rise and underground building.

Traffic safety promotion programs: Xiaoguwei community initiates traffic violation snapshot system, upgrades and standardizes transport facilities, upgrades road greenbelts, conducts real-time road traffic monitoring, rectifies “five types of cars” regularly, and

carries out activities of traffic safety knowledge going into campuses, villages and companies.

Safety promotion programs in construction sites: Xiaoguwei community intensifies inspection and supervision of construction sites and ensures the function of special facilities by recording and monitoring their use; through inspection, urges construction sites to educate all workers on safety knowledge; provides necessary safety protection products and appliances, including safety helmet and safety belt, and ensures that workers can use them properly in operation; improves publicity to increase workers' safety awareness, and encourages them to report illegal operations and regulations to protect their legitimate rights and interests; implements green card system; carries out publicity activities and knowledge competitions on production safety.

Evidence-based strategies: traffic safety promotion programs and safety promotion programs in construction sites

Elderly 65+ years:

Programs of medical volunteers offering free diagnosis, treatment and publicity:

Xiaoguwei community regularly organizes volunteers from medical colleges to publicize health care knowledge in community, provide on-site free diagnosis, carry out free treatment with traditional Chinese medicine, conduct common disease survey among residents, prevent certain diseases, and recommend diet to treat common diseases seen in autumn and winter to improve residents' health level.

Family Service Center programs targeting at senior citizens: the target are mainly senior citizens at the age of or over 60 years old in community. Xiaoguwei community provides home assistance for the aged, by strengthening the health network of the aged

and offering services like entertainment, education, case counseling, etc.

Evidence-based strategies: Family Service Center programs targeting at senior citizens

Natural Disaster: forest fire prevention programs; automatic and lightning-free firefighting control system

Violence prevention: Xiaoguwei Family Service Center programs targeting at senior citizens and youth

Evidence-based strategies: Xiaoguwei Family Service Center programs targeting at senior citizens

Suicide prevention: psychological health education for pupils, psychological health promotion programs for university students and psychological counseling programs for the disabled

Evidence-based strategies: psychological health promotion programs for university students

Programs aiming at “High risk-groups”

The High risk-groups are: university students who often do sports and ride bicycle.

Campus sports safety promotion programs: Xiaoguwei community carries out sports safety education for students who often take sports; rectifies sports venues; sets up injury registration and report system; formulates PE class safety promotion system.

Promotion programs to rectify biking violation: Xiaoguwei community transfers and adjusts road to meet students' biking needs; sets up traffic volunteer center and service team to direct traffic at crossings between teaching and living areas during peak period; formulates parking regulations; conducts traffic control.
