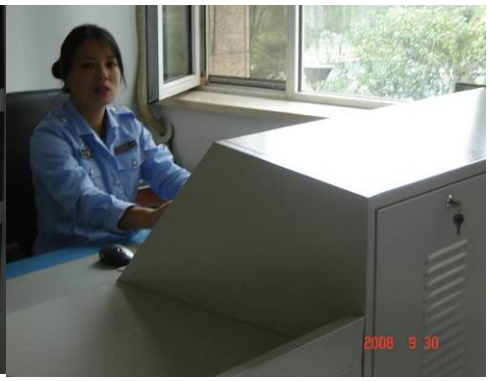
- The Psychological Consultancy Organization for Young People
- Moot Court of “Anti-domestic Violence”
- Security Guard Team
- The “Skynet” Project



Suicide Prevention

- Established the suicide/self harm (intentional injury) working group

Program on “High-Risk” Group

- Interventions on Drunk Driving

- Simultaneous execution of safety education and facility perfection

- “Public Feeling Diary” Team for caring about elder adults

- Injury Surveillance

1. The injury surveillance points in all community clinics and Shahekou District Hospital shall be responsible for collecting the routine data and filling in National Injury Surveillance Report Card.

2. The Shahekou District Hospital shall report the injury information to Centre for Disease Control and Prevention (CDC) on the monthly basis, and then CDC shall make statistics on the injury information and implement the analysis from 8 respects including the probability of injury occurrence, injury type and gender distribution, injury type and age distribution, injury case occupation distribution, injury occurrence locale distribution of different ages, the activity undertaken while the injury occurred, injury severity distribution and injury event consequences.

3. CDC shall feedback the injury analysis result to the Community Safety Evaluation & Assessment Team. Each team shall plan, adjust and rectify the injury intervention measures in accordance with the situation of injury occurrence in due course.

Based on the injury surveillance results, it is concluded that:

The probability is relatively stable and reduced in the stable situation from 1.90% in 2006 to lowest 1.60% in 2008, amid which, the injury occurrence probability of elderly has been decreased by 5.96%, and the injury of children has been decreased by 6.90%.

Based on the injury type analysis, it is concluded that:

Slip/fall and motor vehicle accident occupied the maximum proportion in injury occurrence. According to the comparison analysis on the datum in three years, the injury of above three items shows a descending tendency.

Based on the injury type comparison between the elderly and children, it is shown that motor vehicle accident and slip/fall have been controlled in an effective manner.

Based on the locale of injury occurrence, it is concluded that:

Such places as home, road/street, sport and playground have high probability of injury occurrence. Based on the surveillance results of three years, it is shown a descending tendency.

From the injury occurrence locale of the elderly, such places as sport and playground, trade and service location have low injury occurrence.

From the injury occurrence local of the children, such places as public place, trade and service location have low injury occurrence.

After analysis on the surveillance results of professional organizations, it is shown that:
From the traffic surveillance, the motor vehicle injury and non-motor vehicle injury show a descending tendency.

In accordance with the surveillance results on the community public security, the case occurrence shows a descending tendency year by year.

In accordance with the analysis on fire prevention surveillance results, the fire damage shows a descending tendency year by year and no major fire hazard occurred.

Injury Occurrence Probability Comparison from 2006 to 2008

Year	2006	2007	2008
Injury Cases	1583	1450	1308
Injury Probability%	1.90	1.80	1.60

Elderly Injury Occurrence Comparison from 2006 to 2008

Yearly Cases	Non-motor vehicle accident	Motor vehicle accident	Blunt Instrument Injury	Slip / Fall	Blade / Sharp Instrument Injury	Burn & Scald Injury	Animal Hurt	Others	Total
Cases in 2006	18	15	5	46	18	12	0	2	116
Cases in 2007	16	13	5	42	16	11	0	2	105
Cases in 2008	15	12	4	38	15	10	0	2	96

Elderly Injury Occurrence Locale Distribution from 2006 to 2008

Locale/Year						
	Injured Persons	Injury Proportion %	Injured Persons	Injury Proportion %	Injured Persons	Injury Proportion %
Home	47	2.97	44	3.03	40	3.06
Public Place	3	0.19	2	0.14	2	0.15
School/Public Place	5	0.32	4	0.28	5	0.38
Sport & Playground	15	0.95	11	0.76	10	0.76
Road/Street	43	2.72	40	2.76	36	2.75
Trade & Service Location	7	0.44	6	0.41	6	0.46
Industrial & Public Building Area	0	0	0	0	0	0
Others	2	0.1	2	0.1	2	0.2

Children Injury Occurrence Comparison from 2006 to 2008

Year	Injured Children	Proportion % of injury in whole year
Year 2006	45	2.84
Year 2007	41	2.83
Year 2008	36	2.75

Children Injury Type Distribution from 2006 to 2008

Yearly Cases	Non-motor vehicle accident	Motor vehicle accident	Blunt Instrument Injury	Slip / Fall	Blade / Sharp Instrument Injury	Burn & Scald Injury	Animal Hurt	Others	Total
2006	11	15	7	29	14	9	0	4	89
2007	9	13	6	28	12	8	0	4	80
2008	9	11	6	25	11	7	0	2	71

Children Injury Type Comparison from 2006 to 2008
